EXPERIENCE

Full Stack Engineer, Next Level Media | **Rajshahi, Bangladesh (On Site)** **04/2025 – Present**

- **My Manager** - Contributed across core ERP modules including scheduling, reporting, ticketing, workflow automation, and campaign management in a large-scale MERN-based platform.
- I am primarily responsible for managing **Google Ads using Google REST APIs**, implementing **Twilio A2P 10DLC SMS automation,** and **optimizing employee schedule management** (positions, scheduling, and shifts).
- I have implemented the **Seating and Ticketing module** from Sketch.
- Implement **dynamic reporting** and analytics with **AI-powered insights** and multiple chart visualizations and contributed **Workflow Automation module, Workflow editor**, and multiple feature implementation.
- Implemented **Door-to-Door campaign management** and **fundraising features like GoFundMe and GiveHub.**

Software Engineer, Blackrock It Solutions | **Mesa, Arizona, US (Remote)** **03/2024 – 12/2024**

- **Hybrid Chart Evolve** - Worked on most modules and led the **report module**, including a real-time healthcare staff scheduling system that manages provider **schedules, patient flow, census, and permissions** for doctors and patients across multiple facilities, with the ability to generate location-based reports.
- **TechConnect** – Implement **employee timesheet management, records**, request, and file management module.

Frontend Developer, Excel Technologies Ltd | **Banani, Dhaka (On Site)** **01/2023 – 02/2024**

- **SmartCare Pro** - I contributed to most of the modules, including **Beds, Birth Records, COVAX, COVID, Death Records, Diagnosis, Investigations, Medical Encounters, Pain Records, Past Medical Histories,** etc.
- I was primarily responsible for the **ANC, Vitals, PEP, PrEP, Family Planning, HTS, Medical Encounters** (both Inpatient and Outpatient)**, TB Constitutional Symptoms, Treatment Plans, and Wards modules**.
- **Tuso** - Implement **User Authentication**, User Management, **Ticket management with multiple rule-based access**, and **Remote Desktop Protocol (RDP)** modules.

PROJECTS

Recall – Personal AI Knowledge Engine **12/2025 – Present**

- Built a full-stack AI knowledge workspace as a **Turborepo monorepo** using **Next.js 16, React 19, NestJS 11, and TypeScript**, with separate **web, API, and worker services** plus shared infrastructure packages.
- Developed **AI-powered search and chat workflows** backed by a configurable LLM layer, **Qdrant vector search**, and document-processing pipelines for **extraction, chunking, embeddings, summaries, and transcripts**.
- Designed modular backend architecture using **MongoDB**, **Redis/Upstash caching**, pluggable queue/storage providers, and a dedicated async worker.
- Implemented **authentication and session management** with **Google and GitHub OAuth**, JWT-based sessions, cookie auth flows, and **Docker Compose** for local infrastructure orchestration.

SKILL

JavaScript, TypeScript, React.js, Next.js, Node.js, Express, Nest.js, MongoDB, PostgreSQL, Prisma, Redux, Zustand, TanStack Query, Testing, JWT, Socket.io, Redis, Docker, RabbitMQ, Kong API Gateway, Qdrant, RAG/LLM Integration, CI/CD, Git/GitHub

EDUCATION

M.Sc. in Geography & Environment, Ananda Mohan College | Mymensingh, Dhaka **05/2021**
